SERVICE PACKAGES

Design and BIM, one team, one model

We run design and BIM in parallel: clashes that would surface on site are caught at the drawing stage, and quantities come with the design.

MOTİFO
MİMARLIK - İÇ MİMARLIK

PACKAGE A

Design

Homes, villas, boutique businesses

- Concept and photoreal 3D visuals
- Construction drawings, elevations, details
- Finish schedules, material and product selection
- Samples and supplier coordination

PACKAGE B

BIM Control

Contractors, developers, architecture firms

- Architectural, structural, MEP BIM models
- Discipline coordination and clash reports
- Model-based quantity take-off, overlays
- Revision tracking in the model

PACKAGE C RECOMMENDED

Design + BIM

Corporate offices, retail chains, hotels

- A and B in parallel, on a single model
- The cost of every design decision is visible at once
- Clash-free drawing set before fabrication
- Sales and presentation visuals from the model

PACKAGE D

Turnkey

Interior fit-out projects

- Package C + construction and site management
- Fixed price and schedule based on quantities
- Project management and client reporting
- One contract, one point of contact

Add-ons: 360° virtual tours · promo films and reels · 4D construction-sequence animation · drone footage · facade and landscape design

Errors stay in the model

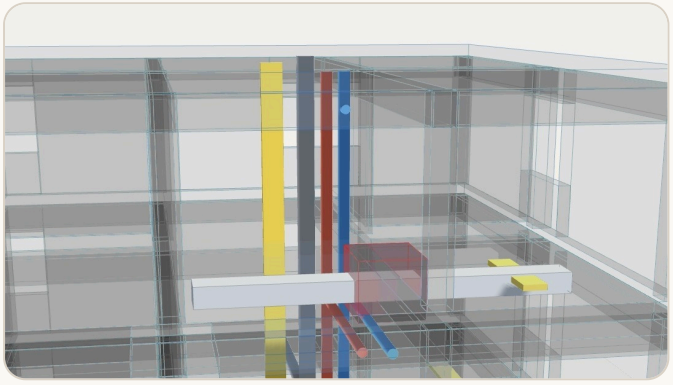

Clashes are found and solved before they reach the site.

Budget visible from day one

Quantities are produced and updated with the design.

One table

Design, BIM and construction meet in one team.

X-ray view of a BIM model: structure transparent, services and the clash point visible.

HOW WE WORK

01 **Survey** · brief and existing conditions

02 **Paid pre-design** · design and BIM model

03 **Quantities and budget** · from the model, item by item

04 **Fixed price** · with a work schedule

05 **Build and handover** · weekly reporting
